

Technical Questions

1. Write a SQL query to find the top 5 customers by total sales, along with their order count.
2. What's the difference between an INNER JOIN and a LEFT JOIN, and when would you use each in a report?
3. How would you handle NULL values in a report where a customer has no recorded sales for a given month?
4. Walk me through how you'd design a report for a stakeholder who says "I just want to see how we're doing."
5. What's the difference between a parameterized report and a static report, and when is each appropriate?
6. How do you handle a report that needs to run against a very large dataset without timing out or becoming slow to load?
7. Explain the difference between a calculated column and a measure in Power BI (or DAX). When would you use one over the other?
8. How would you set up a report to automatically refresh on a schedule, and what are the limitations you'd need to consider?
9. Describe how you'd troubleshoot a report showing incorrect totals when individual line items look correct.
10. A stakeholder asks for a report that will take significant time to build and won't scale well. How do you handle that conversation?

Behavioral Questions

11. Tell me about a time you solved a difficult technical problem.
12. Describe a time you had to learn a new tool or skill quickly.
13. Tell me about a time you had to manage multiple priorities or a tight deadline.
14. Describe a situation where you received critical feedback. How did you respond?
15. Tell me about a time you had to explain something technical to a non-technical person.
16. Describe a time you made a mistake. What did you do about it?
17. Tell me about a time you worked as part of a team to deliver a result.
18. Describe a time you had to be resourceful or figure something out with limited guidance.
19. Tell me about a time you had to pay close attention to detail to avoid a costly error.
20. Why are you interested in this role, and what would you bring to our team?
