SUMMARY

Motivated Software Developer and Associate Member of the Australian Computer Society with nearly 4 years of experience supporting digital transformation initiatives across government, education, and aviation sectors. Highly skilled in full-stack development, scripting, and the administration of development, test, and production environments across Windows and Linux platforms. Proven ability to build, maintain, and support core enterprise applications while working collaboratively under supervision. Based locally in Darwin and eager to bring strong problem-solving skills to high-impact government systems.

SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Java, C#, Python
Front-end & Mobile: HTML5, CSS3, SCSS, jQuery, Bootstrap, React.js, Vue.js, Vuex, AngularJS, Next.js, KendoReact, Vite, Tailwind CSS, React Native, Expo, responsive web design, reusable components
UI Design & Prototyping: Figma, Adobe XD
Accessibility & Usability: semantic HTML, ARIA, keyboard navigation, color contrast testing, Google Lighthouse, user-centered design
CMS & Content Platforms: Squiz Digital Experience Platform, Custom CMS development and administration, SharePoint, SPFx, Power Apps, Power Automate, Microsoft 365, Drupal (learning)
APIs & Integration: REST APIs, Swagger/OpenAPI, Laravel, Node.js, Express.js, Spring Boot, .NET Core, microservices, third-party, and payment integrations
Authentication & Security: JWT, MSAL (Microsoft Entra ID), Keycloak, Clerk, role-based access control, secure coding (XSS, CSRF, SQL injection prevention), PCI standards
DevOps & Version Control: Git, GitHub, GitHub Actions, GitLab CI, Bitbucket Pipelines, Jenkins, Azure DevOps, Docker, SonarQube, Nginx, Linux
Cloud & Databases: Azure Container Apps, Azure Container Registry, App Service, Azure Blob Storage, MySQL, PostgreSQL, Oracle, Redis, SQL Server
Logging/Observability: Serilog, Seq
Tools & Methods: Jira, Chrome DevTools, VS Code, Agile, Scrum
Monitoring, Logging & Workflow Orchestration: Serilog, Seq, Exceptionless, Temporal.io
Logging & Fault Tolerance: Serilog, Seq, Exceptionless, Temporal.io

EXPERIENCE

DevOps Engineer - Internship (Jul 2026 – Present)
Haileybury Rendall School, Berrimah, Darwin

- Redesigned a legacy school web application as a responsive React and Tailwind CSS single-page app, using semantic HTML, keyboard navigation, contrast checks, and Lighthouse audits to improve accessibility.
- Built and administered the Subject Guide application, a content management system where staff create and publish subject content and videos, managing user roles and permissions.
- Integrated MSAL (Microsoft Entra ID) single sign-on, Azure Blob Storage, a Laravel REST API, and MySQL, deployed with Docker.
- Designed user-friendly admin workflows with one task per screen, tooltips, validation, and confirmation messages, reducing input errors for staff.
- Gathered requirements from teachers and admin staff, and wrote plain-language user guides and developer documentation.
- Collaborate in an Agile team using Git, Jira, and CI/CD, contributing to code reviews and continuous improvement, and providing IT support to students and staff.

Software Engineer (Apr 2025 – Jul 2025)
True Blue IT - Darwin Innovation Hub, Darwin

- Designed app screens and user flows in Figma, then built a cross-platform mobile app using React Native and Express.js, covering the user interface and secure API integration.
- Applied accessibility and performance practices, including color contrast, screen reader labels, and optimized loading, so the app worked well for all users across devices.
- Set up Google Analytics to track user behavior and use the insights to improve usability.
- Created marketing and presentation visuals in Canva and presented progress demos to stakeholders.
- Tested and resolved bugs, and wrote technical documentation and handover notes to support project continuity.
- Collaborated with mentors and industry experts through the CodeUp NT program.

Senior Software Engineer (Jan 2024 – Oct 2024)
Software Engineer (Aug 2022 – Dec 2023)
Information Systems Associates (ISA) - Colombo, Sri Lanka

- Led front-end development for Air Arabia's customer-facing Internet Booking Engine using AngularJS and SCSS, integrated with a Java Spring Boot backend, focusing on usability, performance, and security.
- Built and integrated REST APIs for payments and third-party services, following PCI security standards and protecting sensitive passenger data.
- Prioritized and resolved production issues within SLA, tracing root causes through log analysis while keeping planned releases on track.
- Improved service reliability through Jenkins and Docker deployment automation and database optimization.
- Worked closely with product managers and the UI/UX team to clarify requirements, and mentored junior developers through code reviews.
- Built Power BI dashboards to identify recurring issues and support service improvements.

Associate Software Engineer (Jan 2022 – Jul 2022)
Intern Software Engineer (Jul 2021 – Dec 2021)
VizuaMatix (Pvt) Ltd - Colombo, Sri Lanka

- Developed front-end features for a Vue.js CRM for a Sri Lankan government client, enabling administrators to create and publish dynamic forms and manage content, users and access.
- Built responsive dashboards using Vue.js and React.js that worked across desktop and mobile.
- Developed REST APIs using Spring Boot and MySQL, with Swagger documentation for reliable integration.
- Implemented identity and access management using Keycloak.
- Took part in sprint planning, design discussions, and peer code reviews.

PROJECTS

Digital Platform for Medical Student Progression & Records
Charles Darwin University
Developed a platform for tracking medical students' progress and records.

- **Technologies:** Power Apps · Power Automate · SharePoint · Microsoft 365

NT Wet Season Incident & Resource Coordinator (Personal full-stack project – in development)
Darwin, Australia
Building a full-stack incident coordination system for Northern Territory wet season emergencies, enabling field officers to report incidents and coordinators to assign resources while enforcing business rules that prevent conflicts such as double-booked equipment.

- **Technologies**: .NET, C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, React, Docker, Azure, RabbitMQ, IIS, OpenLDAP

NT FireWatch – Geospatial Bushfire Monitoring Platform (Personal full-stack project)
Darwin, Australia
url - www.firewatch.chathura.com.au
Built a cross-platform application that visualizes near-real-time satellite fire-hotspot data across the Northern Territory, ingesting and spatially filtering feeds to an interactive map with recency-based styling and secure user access, deployed to the cloud through an automated CI/CD pipeline.

- **Technologies**: React, Expo (web & mobile), Express, PostgreSQL, PostGIS, QGIS, Clerk, Docker, Jenkins CI/CD, Apache HTTP Server, AlmaLinux (RHEL), Azure

CERTIFICATIONS & TRAINING

- **Component Service - Building and managing components for developers - Squiz Academy**
- **Microsoft AZ-900 (In progress)**
- **ASP.NET Core (.NET 10)**
- **Power BI Essential Training**
- **Learning Jira (Cloud Edition)**
- **Microsoft SQL Server 2022 Essential Training**
- **Getting Started with Microsoft 365**
- **Ochre**
- **National Police Check**
- **NT Driving License**

EDUCATION

Master of Information Technology (Software Engineering)
Charles Darwin University, NT (Nov 2024 - Oct 2026)

B.Sc. (Hons) Degree in Computer Science
General Sir John Kotelawala Defense University, Sri Lanka (Jan 2018 - Jan 2022)

ACTIVITIES & ACHIEVEMENTS

GovHack 2025
Built an AI tool using RAG and vectorized metadata, providing full audit trails for reliable government decision support.
CDU IT Code Fair 2025
Designed and developed a solution to conduct sentiment analysis on public tourism data to predict economic impacts and propose data-driven growth strategies for the Territory.
