PROFESSIONAL SUMMARY

Full-Stack Software Engineer with nearly four years of commercial experience building multi-layered web applications and REST/SOAP integrations across aviation, banking, education and telecommunications. Skilled in C#, .NET (ASP.NET Core Web API, MVC, Entity Framework Core), SQL Server, Java (Spring Boot), React, AngularJS and Azure. Proven ability to turn operational data into actionable business insights using MySQL and Power BI. Holds a current NT Ochre Card and National Police Check.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, TypeScript, Python, PHP, SQL

Backend: .NET Core, ASP.NET Core , Entity Framework Core, LINQ, Spring Boot, Spring Security, Spring Data JPA, Spring Cloud, Node.js, Express.js, Sequelize, Laravel.

Integration & APIs: REST APIs, SOAP web services, gRPC, RabbitMQ, Swagger, microservices, third-party and payment integrations

Databases: Microsoft SQL Server, MySQL, PostgreSQL, SQLite, Redis, Firebase

Frontend & Mobile: React.js, Next.js, AngularJS, Vue.js, Vuex, KendoReact, React Native, Expo, HTML5, CSS3, SCSS, jQuery, Bootstrap, Tailwind CSS

UI Design & Prototyping: Figma, Adobe XD

CMS & Content Platforms: Squiz Digital Experience Platform, custom CMS development and administration, SharePoint

Testing: Unit testing, cross-device testing, NUnit, JUnit, Jest

Authentication: Microsoft Entra ID (MSAL), Keycloak, Clerk, OpenLDAP, Firebase Authentication, JWT

DevOps & CI/CD: Git, GitHub, Azure DevOps, GitHub Actions, GitLab CI, Bitbucket Pipelines, Jenkins, Docker, SonarQube, IIS, Nginx, Apache, Linux, PowerShell

Cloud, BI & Microsoft Platform: Microsoft Azure (Container Apps, Container Registry, App Service, Blob Storage, VMs), Power BI, Power Apps, Power Automate, SharePoint (SPFx), Microsoft 365

Logging & Monitoring: Serilog, Seq, Exceptionless, Temporal.io

Data & Machine Learning: Machine Learning, Deep Learning, Exploratory Data Analysis (EDA), Acoustic Signal Processing

Development Tools: Visual Studio, SQL Server Management Studio, Rider, VS Code, IntelliJ IDEA, DataGrip, PhpStorm, Chrome DevTools, Jira

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

DevOps Engineer (Internship) — Jul 2026 – Sep 2026

Haileybury Rendall School, Berrimah, Darwin, NT

- Modernised Subject Guide, a legacy web application that helps students and parents choose school subjects, into a responsive React single-page application backed by a Laravel REST API with strict request validation and versioned endpoints.
- Built a CRM-style admin panel for staff to manage subject content and to create and manage parent–teacher meetings.

- Learned Microsoft Entra ID (MSAL) and Azure Blob Storage on the job, delivering role-based authentication and secure file delivery with SAS tokens.
- Analysed legacy systems by tracing data flows across the database and application code, documenting findings before changes, and consolidating duplicate and inconsistent records into a single trusted record.
- Containerised the application with Docker, managed Git branching and pull requests in Bitbucket, and wrote unit tests with Jest.
- Worked in an Agile team using Jira, contributing to code reviews and technical documentation, including API reference guides and database schemas.
- Delivered daily IT help desk support, resolving application, hardware and account access issues for students and staff.

Software Engineer **Apr 2025 – Jul 2025**
True Blue IT – Darwin Innovation Hub, Darwin, NT

- Designed and built a cross-platform mobile app with React Native, and developed the Express.js REST API behind it, including secure authentication and data integration.
- Tested the app across devices, wrote unit tests with Jest, and resolved bugs before release, delivering a stable app on iOS and Android.
- Designed and managed MySQL databases, keeping data accurate and consistent for business reporting.
- Wrote technical documentation and handover notes so the next development team could continue without disruption.
- Presented progress and worked with mentors and industry experts through the CodeUp NT program.

Senior Software Engineer **Jan 2024 – Oct 2024**
Software Engineer **Aug 2022 – Dec 2023**
Information Systems Associates (ISA), Colombo, Sri Lanka

- Led feature development on Air Arabia's booking platform from design to release, including design documents, design reviews and Swagger API contracts, coordinating work across developers, QA, designers and product managers.
- Built and maintained features in a legacy ASP.NET MVC (C#) backend with SQL Server, including new endpoints, request validation and error handling.
- Integrated the .NET backend with search, payment and ancillary microservices via gRPC, and built REST APIs exposed through the API gateway.
- Developed and supported SOAP web services for online travel agency (OTA) partners, tested with SoapUI, and used RabbitMQ to send booking confirmation emails asynchronously.
- Worked with business analysts, product managers and third-party payment teams to gather requirements and deliver PCI-compliant integrations.
- Investigated and resolved high-priority production issues across services, and wrote NUnit unit tests for fixes and new features, running in the CI pipeline.
- Automated builds and deployments with Jenkins and Docker, and built Power BI dashboards to track recurring issues.
- Mentored junior engineers through code reviews and knowledge sharing.

Associate Software Engineer **Jan 2022 – Jul 2022**
Intern Software Engineer **Jul 2021 – Dec 2021**
VizuaMatix (Pvt) Ltd, Colombo, Sri Lanka

- Built features for a government client's CRM in Vue.js and Vuex, letting administrators create and publish dynamic forms and manage content and users.
- Developed scalable REST APIs using Spring Boot, Spring Data JPA and MySQL, with clear Swagger documentation.

- Built responsive dashboards using React.js and Vue.js, helping users access and manage information efficiently.
- Improved system security by implementing identity and access management with Keycloak.
- Collaborated in an Agile team through design discussions, sprint planning and peer code reviews.

PROJECTS

GovWallet NT – Privacy-First Concession Card Wallet

CDU IT Code Fair 2026, Darwin

Built GovWallet NT, a digital wallet that lets a cardholder prove eligibility by QR code without revealing personal details, using SD-JWT selective disclosure. Developed an ASP.NET Core issuer API with ECDSA P-256 signing, and two React PWAs: a wallet with a non-extractable device key, and an offline verifier that shows only "eligible" or "not eligible". Deployed on Azure, with tests and a threat model.

Technologies: C#, ASP.NET Core Web API, Entity Framework Core, SQLite, React, Progressive Web Apps (PWA), SD-JWT, KB-JWT, JWK, ECDSA P-256, WebCrypto API, html5-qrcode, SCSS

NT FireWatch – Geospatial Bushfire Monitoring Platform

Personal full-stack project, Darwin | firewatch.chathura.com.au

Built a cross-platform application that visualises near-real-time satellite fire-hotspot data across the Northern Territory, ingesting and spatially filtering feeds to an interactive map with recency-based styling and secure user access, deployed to the cloud through an automated CI/CD pipeline.

Technologies: React, Expo (web and mobile), Express.js, PostgreSQL, PostGIS, QGIS, Clerk, Docker, Jenkins CI/CD, Apache HTTP Server, AlmaLinux (RHEL), Azure

NT Wet Season Incident & Resource Coordinator

Personal full-stack project (in development), Darwin

Building a full-stack incident coordination system for Northern Territory wet season emergencies, enabling field officers to report incidents and coordinators to assign resources while enforcing business rules that prevent conflicts such as double-booked equipment.

Technologies: .NET, C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, React, Docker, Azure, RabbitMQ, IIS, OpenLDAP

Digital Platform for Medical Student Progression & Records

Charles Darwin University

Developed a platform for tracking medical students' progress and records.

Technologies: Power Apps, Power Automate, SharePoint, Microsoft 365

GovHack 2025

Darwin, NT

Built an AI decision-support tool with full audit trails to support reliable government decision-making.

EDUCATION

Master of Information Technology (Software Engineering) **Nov 2024 – Oct 2026**
Charles Darwin University, Darwin, NT

B.Sc. (Hons) Computer Science **Jan 2018 – Jan 2022**
General Sir John Kotelawala Defence University, Sri Lanka

CERTIFICATIONS & TRAINING

- Microsoft AZ-900 Azure Fundamentals (in progress) – Microsoft
- ASP.NET Core (.NET 10) – Professional Development
- Microsoft SQL Server 2022 Essential Training – LinkedIn Learning
- Power BI Essential Training – LinkedIn Learning
- Learning Jira (Cloud Edition) – LinkedIn Learning
- Getting Started with Microsoft 365 – LinkedIn Learning
- NT Working with Children Clearance (Ochre Card), National Police Check, NT Driver Licence

REFEREES

Available on request.
