

Business Analyst Project Canvas - CDU Careerbuddy App

OBJECTIVES & PURPOSES		VALUES	
<i>What measurable goal do you want to achieve with this project?</i>		<i>What creates a real value for your user and which ties him to your product?</i>	
• Gather Northern Territory career resources, job postings, and CDU events. • Increase student graduate employment rates through AI-driven career prep. • Measurable KPIs: 2000+ active student users within 3 months, 500+ AI mock interviews completed, 20% increase in CDU Career Event registrations.		• All-in-One Convenience: Jobs, events, and resume tips unified in a single mobile portal. • 24/7 Personal AI Coach: Instant feedback on interview skills anytime, anywhere. • Community Insights: Real interview experiences and tips shared by senior peers.	
PERSONAS	PROBLEMS TO SOLVE	COMPONENTS & FEATURES	
<i>Describe user archetype.</i>	<i>Weaknesses of current solutions.</i>	<i>Main modules & features.</i>	
1. Final-Year Students: • Seeking grad programs & high-stakes interview prep. 2. Junior Students: • Looking for internships, part-time gigs & resume help. 3. CDU Career Advisors: • Staff managing events & publishing student resources.	• Students frequently miss strict corporate Graduate Program deadlines. • Lack of low-stress, personalized interview practice tools. • Career event information is buried in university emails and often ignored. • Fragmented job search across multiple external platforms.	COMPONENTS: • Job Aggregator, AI Career Coach, CDU Event Hub, Community Peer Forum. FEATURES: • Job Search & External Apply redirection (with visa work-hour alerts). • CDU Career Event Calendar & one-click registration. • Resume & Industry Info Library with standard templates. • Graduate Program Alerts & deadlines tracking. • AI Mock Interviews & Q&A Assistant with tailored feedback.	
STAKEHOLDERS	RISKS	MILESTONES	DELIVERABLES
<i>Who needs to be involved & their roles.</i>	<i>What could go wrong?</i>	<i>Roadmap from MVP to Launch.</i>	<i>What will the team produce?</i>
INTERNAL STAKEHOLDERS: • CDU Career Centre: Project sponsor & core content provider. • CDU IT & Security Department: SSO integration & data privacy gatekeepers. • CDU Student Council (CDUSC): Student advocacy & campus promotion. • Project Delivery Team: BA, Project Manager, Devs & UI/UX. EXTERNAL STAKEHOLDERS: • Northern Territory (NT) Government: Major employer (Grad programs) & local regulator. • CDU Students (End-Users): Domestic & International (with 48h visa limit rules). • Local NT Employers & Industry Partners: Direct job posters across Darwin. • Fair Work Ombudsman & Legal Advisors: Labor law & Australian Privacy Act compliance. • AI Service Providers (OpenAI/Gemini): LLM API support & SLA governance.	• AI Hallucinations: Providing inaccurate career or legal advice. Requires strict prompt tuning. • Compliance & Privacy: Strict handling of student PII under Australian Privacy Principles. • Technical Dependencies: Unstable web scraping for external job feeds and university API limits. • Hard Deadlines: Academic semester alignment cannot be delayed.	• Month 1: MVP Scope, Requirements Elicitation & Wireframes Locked. • Month 2: Core Platform Development, Job Scraper & CDU SSO Integration. • Month 3: AI Coach Module Integration & Prompt Engineering Tuning. • Month 4: Beta Release & Field UAT with Students & Advisors. • Month 5: App Store Review, Final Polish & Official Go-Live!	• Business Analysis Artifacts: - User Stories (INVEST & Given-When-Then) - Requirement Traceability Matrix (RTM) - As-Is / To-Be Process Flow Diagrams • Technical & Design Outputs: - AI Prompt Guidelines & Test Reports - UI/UX Wireframes & Prototypes - UAT Sign-off Documentation
	CONTEXT OF USAGE <i>Where & how will the app be used?</i>	TECHNOLOGY <i>Tech stack used.</i>	PLATFORM & RELEASE <i>Devices, OS & distribution.</i>
	• High mobile usage on campus, commuting, and at home. • Stable internet connection required for real-time AI & live job feeds. • Push notifications enabled for urgent deadlines.	• Mobile UI: Flutter (Cross-platform iOS & Android) • Backend API: Node.js / Express • AI Integration: LLM API (Gemini/OpenAI) • Data Extraction: Web Scrapers for job boards	• Supported Devices: iOS & Android smartphones, plus Web Admin Portal for CDU staff. • Release Channels: Public Apple App Store & Google Play Store, secured via CDU Student SSO authentication.
