SUMMARY

Detail-oriented IT professional pursuing a career as a Business Analyst, with practical exposure to requirements engineering and business process optimization. Demonstrated capability in eliciting stakeholder requirements, developing Business Requirements Documents (BRDs), defining Agile User Stories, and mapping "As-Is/To-Be" workflows using industry-standard tools (BPMN, SQL, Power BI, Jira). Brings a strong analytical mindset and excellent problem-solving skills, developed through managing high-volume customer interactions and ensuring strict operational compliance in fast-paced environments. Comfortable working within Agile/Scrum teams to bridge the gap between business objectives and technical delivery, ensuring clear alignment between stakeholders and developers.

EDUCATION

Charles Darwin University **Darwin, NT**
Master of Information Technology 03/2025 - Present

South China Agricultural University **Guangzhou, China**
Bachelor of Public Administration

09/2014 - 07/2018

TECHNICAL SKILLS

- **BA & Agile Tools:** JIRA, Confluence, Trello, Planner, Git, GitHub
- **Process Modeling:** Visio, Lucidchart, Draw.io, BPMN, Data Flow Diagrams, State Diagrams
- **Data & Analytics:** SQL, Power BI, Excel (Pivot, VLOOKUP), Python
- **Productivity & Security:** MS Office Suite, Teams/Outlook, SharePoint, Notepad++, KeePass

TECHNICAL PROJECTS

Agile Requirements & BRD Development: Food Delivery Application

- Elicited and analyzed business needs for a food delivery application, aiming to reduce cart abandonment and increase Average Order Value (AOV) for multi-user checkouts.
- Authored a comprehensive Business Requirements Document (BRD) outlining project scope, business rules, and success metrics (KPIs).
- Developed detailed target personas and drafted Agile User Stories with strict Acceptance Criteria to guide the technical development team.

Operational Efficiency & Process Modeling: Retail Service Station

- Analyzed fast-paced front-of-house operations at a retail service station, focusing on hot food display management and POS efficiency.
- Designed and mapped comprehensive "As-Is" and "To-Be" process flowcharts using Business Process Model and Notation (BPMN) to visualize operational bottlenecks.
- Proposed optimized workflows including automated temperature monitoring and standardized digital checklists for site-specific closing procedures, aiming to reduce food waste and improve compliance.

CERTIFICATIONS AND COURSES

- **Certifications:** LinkedIn (Introduction of Business Analysis, Agile Requirements, Business Analysis Essential Tools and Techniques, Asking Effective Questions During Requirements Elicitation)
- **Courses: Jira, Confluence, Power BI, SQL, BPMN**
